Professional Summary

Backend-focused Software Engineer with professional software development experience since 2020, specializing in PHP, Symfony, TypeScript, Node.js, NestJS, Go, Gin, PostgreSQL, MongoDB, GraphQL, RESTful APIs, Cloud (AWS, GCP) and software architecture. Experienced across the software development lifecycle, including requirements analysis, system design, implementation, integration, testing, deployment, troubleshooting, and production support. Background spans IoT, telecommunications, AI, computer vision, remote teleoperation, autonomous vehicles, real-time communication, distributed systems, and Linux infrastructure. Comfortable working across backend services, APIs, databases, cloud services, networking, and infrastructure, with experience integrating software with operational and industrial systems. Strong foundation in system integration, scalable architecture, and maintainable software engineering practices.

Technical Skills

- **Backend:** PHP, Symfony, TypeScript, Node.js, NestJS, Go, Gin, Java, Spring Boot, C#, .NET, ASP.NET
- **Databases:** PostgreSQL, MySQL, Microsoft SQL Server, T-SQL, SQLite, MongoDB, Redis, Neo4j, Oracle, Entity Framework, LINQ
- **APIs & Architecture:** REST APIs, RESTful APIs, SOAP, GraphQL, gRPC, WebSockets, WebRTC, Microservices, Event-Driven Architecture, DDD, SOLID, Design Patterns, Hexagonal Architecture, Clean Architecture, MVC, System Design, Design Documentation, TDD
- **Infrastructure & Cloud:** Linux, Shell Scripting, NGINX, Apache, Docker, Docker Compose, Git, GitHub, GitLab, Jenkins, CI/CD, SSH, Virtualization, AWS, GCP, Azure, Azure Logic Apps, Azure Functions, Azure Storage, Azure API Management
- **Messaging & Real-Time:** RabbitMQ, MQTT, Mosquitto, TCP, UDP, RTP, RTSP, SIP, ONVIF, cURL, JSON, JWT
- **AI & Computer Vision:** NVIDIA Jetson, YOLO, OpenCV, Tesseract, LLM, RAG, AI Agents
- **Data & BI:** Power BI, DAX, Excel, VBA, Visual Basic, ABAP
- **Methodologies:** Agile, Scrum, Kanban
- **Additional:** JavaScript, React, Vue, Angular, C, C++, Python, Qt, QML, IoT, MVNO, VoIP, Telemetry, CAN, CANopen, FFmpeg, GStreamer

Professional Experience

Development Analyst
SEESTEC Engenharia e Tecnologia | 01/2026 - Present

- Design, develop, test, deploy, and maintain software solutions across the software development lifecycle, from requirements analysis and system architecture to production support.
- Develop and evolve software solutions for AI, IoT, remote teleoperation, and autonomous vehicle applications, working across backend systems, real-time communication, telemetry, computer vision, and distributed infrastructure.
- Design and implement APIs, web services, backend routines, and integrations with internal and third-party systems using PHP, Symfony, TypeScript, Node.js, NestJS, Linux, NGINX, Docker, Docker Compose, Git, Shell Scripting, MongoDB, Redis, MySQL, and SQLite.
- Develop and integrate real-time communication systems involving WebSockets, WebRTC, RTP, RTSP, SIP, TCP, UDP, MQTT, and ONVIF.
- Work with AI and computer vision environments using NVIDIA Jetson, YOLO, OpenCV, and Tesseract, including integration of LLM, RAG, and AI-agent capabilities.

- Perform unit, integration, and system testing, troubleshooting, root-cause analysis, performance optimization, technical documentation, and production support.

Development Analyst
ARQIA Telecom & IoT Latam | 09/2025 - 01/2026
- Developed and maintained software solutions for IoT, MVNO, and VoIP environments.
- Developed REST and SOAP APIs, web services, and system integrations using PHP, JavaScript, MySQL, C#, .NET, ASP.NET, and Microsoft SQL Server.
- Worked with Microsoft SQL Server, T-SQL, Entity Framework, LINQ, and Azure services including Logic Apps, Functions, Storage, and API Management.
- Performed unit, integration, and system testing, bug fixing, security practices, and performance optimization.
- Collaborated with analysts, testers, designers, and developers in Scrum and Kanban environments.

Technical Analyst
SITECH Brazil | 11/2023 - 10/2024
- Developed software solutions for teleoperation imaging and remote control of autonomous vehicles using C, C++, JavaScript, React, Node.js, Python, MySQL, Qt, QML, MQTT, and Mosquitto.
- Developed, tested, deployed, and maintained software environments and database systems.
- Administered database servers, supported Linux and server infrastructure, and performed network diagnostics.
- Worked with telemetry networks and CAN/CANopen in industrial systems, integrating software, networking, and operational technologies.

Commercial Assistant / Automation & Data
Sotreq | CAT Latam | 09/2020 - 11/2023
- Developed process-automation and data-analysis tools using Visual Basic, ABAP, and SQLite.
- Built KPIs and interactive dashboards using Power BI, DAX, Excel, and VBA to support commercial analysis and decision-making.

Education

Postgraduate Degree in Software Architecture
FIAP - Faculdade de Informática e Administração Paulista | 12/2026 - 01/2028 (expected)

Coursework focused on software engineering, application development, information technology, artificial intelligence, databases, cloud computing, and software systems.

Technology Degree in DevOps
UNIDERP - Universidade Anhanguera | 02/2021 - 07/2023

Focus on DevOps engineering, software development, infrastructure automation, CI/CD, cloud and networking, monitoring and observability, containerization and orchestration, security, and software delivery practices.
